What people say about SEMICON SEA 2022

"Excellent opportunity with excellent platform & organizer! A great exhibition from all aspects; information, interaction, and organization. The high-profile visitors made the event valuable."

May Yeap, Cortex Robotics

"SEMICON SEA 2022 was a great turn out. We have many meaningful conversations at our main booth, as well as a great response at the Workforce and Talent Development kiosk. The team at SEMI has done a great job."

Murray Liston, Edwards

"This is our first year participating in physical exhibition at SEMICON SEA! It was a great event and right platform to showcase our products and solutions. We received a huge response and inquiries from high-caliber visitors who were eager to know more about AOI Solutions and we've had some brilliant conversations across this 3 days event. A big thank you to the entire team and it was well worth the participation. We look forward to participating next year!"

Tai Chen Yee, Ideal Vision Integration

"It was a very well-organized event, showcasing a wide array of agenda and events relevant to the current needs of the industry. Gained immense insights from the speaking summit, exhibitor booths, networking opportunities, etc. Keep up the good work and looking forward for SEMICON 2023!"

Joseph Fernandez, Western Digital

"SEMI SEA 2022 was all about 'Community'. This irreplaceable show means a lot to SurplusGLOBAL. It brings people together and connects, especially after three years of the COVID-19 pandemic. We could finally meet on-site and enjoyed many inspiring discussions over the show. I hope we gather again for next year at SEMICON SEA 2023 in Penang with the same ardor and excitement."

Rose Lee, SurplusGLOBAL

"A big thank you to the entire SEMI SEA team for the excellent work done in organizing a very successful SEMICON SEA 2022! I am glad that I have the opportunity to work with individuals who were so committed and determined to making this event a great success! We look forward to working with you again."

Chua Chor Hong, JSR

"Best-ever visitors turnout engaging exhibitors during SEMICON SEA 2022! Thanks to the SEMICON SEA organising team headed by President Linda Tan enhancing Semiconductor Industry resilience in the SEA Regional. Looking forward to doubling the success in SEMICON SEA 2023!"
